Webinar on Important Life Lessons are often out of Syllabus

A webinar was conducted on 6th August, 2020 on the topic "Important Life Lessons are often out of Syllabus". Dr. Prachi Agrawal, HoD of Mathematics of Brijlal Biyani Science College was the distinguished speaker. This webinar was taken through zoom and only 100 participants could join it and many missed the opportunity to listen to this lecture.

It was indeed a very insightful and motivational session. Dr. Agrawal. She covered all the important points which are the need of hour. There is so much uncertainty and chaos all around. Considering the scenario and what the students are going through, she covered all the points appropriately.

The truth is that no life Lessons and skills are covered in the curriculum which are essential for survival. Dr. Agrawal covered the various Life Lessons viz., adapting and accepting change, having patience, avoiding to influenced by negative talks, being organized, living in the present moment and reminding positive. She elaborated each lesson with a distinctive story and incident. She emphasized that the students take this opportunity given to them by covid and take full advantage and develop themselves.

A very inspiring session which was beneficial not only to the students but also the faculty members.

Webinar on How to Start a Start Up

A webinar was arranged on How to start a start up on 15th August 2020. CEO of BadaBusiness.com, Dr. Vivek Bindra was the speaker. The YouTube link was shared with the students.

Dr. Bindra covered various success strategies for entrepreneurs and solopreneurs. He also gave the strategies to his audience to bounce back post corona. He gave a golden statement to the students "The more your money works for you the less you have to work for money. "

He also elaborated how to use technology for speed and scale, he also explained Management by Absence, what he called as MBA. He also emphasized on continuous improvement, development and learning. He also cited some examples for the better understanding of the audience. He said it is equally important that you know how to tackle and handle your clients. He also emphasized that if you give more than what you promised to your clients, they will promise you lifetime value.

In this world of gateways of information, how you utilize the information determines your success or failure.

The object to encourage the young blood towards making of repreneurs and solopreneurs was widely achieved through this webinar. The webinar was open for the general public also. Modiji's vocal for local can be achieved by such motivational and guiding webinars.

Analysis of various milk samples for detection of adulteration in milk is carried out. Various tests done for detection of adulteration in milk is Detection of Neutralizers in milk, hydrogen peroxide, formalin, sugar in milk, starch, urea, salt, pulverized soap, detergents in milk, skim milk powder in milk, benzoic and salicylic acid in milk. Milk samples analysed and report of analysis of various milk samples for various test is done for detection of adulteration in milk. Detection of adulteration in milk and its analysis from different milk samples will help to

optimise analysis of dairy products - from improving quality and safety of raw milk and other material, through to milk standardisation and verification of end products.

Milk can be adulterated in any step before processing as well as during processing and before packing by adding water, reagents and prohibited neutralisers like hydrated lime, sodium hydroxide, sodium carbonate or sodium bicarbonate are added to milk to prevent spoilage. The longevity of milk increases and gives the vendor that much time to sell. Reagents like salt and glucose are added to alter the thickness and viscosity. Adding starch prevents curdling of milk. Salt and detergents are added to adjust the lactometer reading to add thickness to the milk. Therefore, it is essential to detect adulteration in milk.

Recycled Paper Bag Workshop of B. Sc. III Chemistry Students

Extension Activity - Year 2020-21

Recycled Paper Bag Workshops was organised by Dr (Ms) S. N. Gupta, Department of Chemistry for B. Sc. III Chemistry Students at Brijlal Biyani Science College, Amravati on 26th December 2020. The sole reason of undertaking this workshop was to make students understand the harm caused due to plastic bags and to encourage them to replace plastic bags with paper bags. In this workshop students were taught how to make 5 different types of paper bags and different articles such as Coaster, Pen Stand, Basket, Dustbin etc. out of newspaper. Total 40 students of B.Sc.III CBZ were present.

In this workshop the students have made 5 different types of paper bags out of newspapers. Afterwards they have signed it with their name and message. Each students have made 5 paper bags of 5 different types and then they distributed them in grocery stores in their vicinity thereby they have spread the message of 'Say No to Plastic'. Students have not just learned the art of making a paper bag, they also learned the importance of recycling and how it can benefit everyone. The things that students learned will be taught to the people living in slum areas. In this workshop the students have also made different articles such as Coaster, Pen Stand, Basket, Dustbin etc. out of newspaper.

DRINKING WATER ANALYSIS – YEAR 2020-21

Drinking water analysis of various samples of Amravati region was done on 18th December 2020. The drinking water samples were taken from the main water sources where maximum peoples were using them for drinking purpose. Measurement of Temperature, pH, Conductivity, Total Dissolved Solids (TDS), Salinity, Turbidity and Dissolved Oxygen was done by Digital Water and Soil Analysis kit Labtronics Model-191E-an ISO 9001.

Following 45 B.Sc. III PCM students participated in Drinking water analysis of various samples of Amravati region done on 18th December 2020.

Desirable limit of drinking water for various parameters are Temp 25°C, pH 6.5-8.5, Turbidity 5 NTU, Colour 5 Hazen Units, Total Dissolved Solids 500 ppm, Salinity 100 ppm, Dissolved Oxygen 3 ppm and above, Most of the water samples were within WHO/ ISI standards. For samples which do not have physico-chemical parameters within desirable limit, treatment for correction of corresponding parameter is to be done.

The results of the present analysis showed that drinking water collected from different areas of Amravati was found to be suitable for human health. It is recommended to boil water, use aqua guards, proper chlorination, use efficient system for garbage collection and its disposal, sewage waste treatment, recycling of waste into useful products such fertilizers, education of people through media about the causes and consequences of water pollution.

Bioelectrical impedance analysis method involves determination of Body Weight, Body Fat Percentage, Segmental Subcutaneous Fat Percentage (Whole Body, Trunk, Arms and Legs), Visceral Fat percentage, Segmental Skeletal Muscle Percentage (Whole Body, Trunk, Arms and Legs), Resting Metabolism, Body Mass Index and Body Age. Results are interpreted in terms of ideal weight, overweight, underweight, Period required for weight Loss / Gain at the rate of 1.5 kg per month, Period required for wt maintenance, Fat %, Subcutaneous Fat % (Trunk), Visceral Fat %, Skeletal Muscle % (Whole body), RM, BMI, Body Age. It also highlights correct weight reduction and instructions for better health improvement and weight loss, weight gain and weight maintenance programme.

For ideal weight management and for a more accurate and precise body composition analysis full Body Sensing Technology Karada Scan Body Composition Monitor – HBF-375 is used which measures body composition- Body Weight, Body Fat Percentage, Segmental Subcutaneous Fat Percentage (Whole Body, Trunk, Arms and Legs), Visceral Fat percentage, Segmental Skeletal Muscle Percentage (Whole Body, Trunk, Arms and Legs), Resting Metabolism, Body Mass Index and Body Age. The general principle behind bioelectrical impedance analysis is that two or more conductors are attached to a person's body and a small electric current is sent through the body. The resistance between the conductors provides a measure of body fat between a pair of electrodes, since the resistance to electricity varies between adipose, muscular and skeletal tissue. Fat-free mass (muscle) is a good conductor as it contains a large amount of water (approximately 73%) and electrolytes, while fat is anhydrous and a poor conductor of electric current.

STUDENT INDUCTION PROGRAM (2020-21)

4 th November to 9th November-2020

MENTORING ACTIVITY:

The aim of mentoring activity was to help students to improve their skills, attitudes, and resources necessary to succeed, both in the college environment as well as to pursue productive and satisfying lives. Respect for diversity and a commitment to students' personal growth are the guiding principles in the work we do. With this commitment, we had a fresh take at an effective mentorship program at Brijlal Biyani Science College, Amravati. It was designed with the aim of providing a platform for productive interaction and guidance of 1st year students by faculties. To achieve the above said goals different activities were conducted, the details of which was provided to the mentors of each batch. . On 06/11/20 following values were discussed by way of sharing powerPoint presentation and giving number of examples to make the concept clear, so that students may implement these values in their daily lives such as :-

- Acceptance to Change
- Patience
- Feeding the Positive Feeling
- Keeping Organized
- Cultivate Goodness
- Power of Positivity
- Gratitude

At the end, a task of writing thank you letters or making thank you cards for whoever they feel grateful to was given to the students

on 08/11/20 the following points were discussed like:-

- SELF and BODY and PROSPARITY
    - Want — have a desire to possess or do (something); wish for.
    - Need — require (something) because it is essential or very important rather than just desirable.
- Peer Pressure
    - Positive Peer Pressure
    - Negative Peer Pressure

At the end, a task was given to the students that to list out five different things that they bought but did not use.

The students took following benefits from this activity:-

- Gain practical advice, encouragement and support
- Learn from the experiences of others
- Increase their social and academic confidence
- Become more empowered to make decisions
- Develop your communication, study and personal skills
- Develop strategies for dealing with both personal and academic issues
- Identify goals and establish a sense of direction
- Gain recognition for your skills and experience

Thus the take Away by the Students is that they understood universal human values. They explored how to take decisions with courage, be aware of relationships, be sensitive to others, understand the role of money in life, and feeling of prosperity, difference between want and need, why to be patient, organized, etc. Human values as enshrine in our constitution like justice, liberty, equality, fraternity, human dignity and the unity and integrity were also understood. Dr. P.R. Agarwal and Dr. V.S. Tondre took efforts to conducted this activity.

STUDENT INDUCTION PROGRAM (2020-21)

4 th November to 9th November-2020

LITERARY ACTIVITY REPORT

Literary means concerned with or connected with the writing, study, or appreciation of literature. Literary words are used in a piece of writing such as a poem, speech, or novel. These activities are useful to develop literacy skills, and to cultivate association between these skills and the skills of speaking and listening.

Basically there are six types of literary activities viz..Pre-reading during reading, Post Reading, pre-Writing, During-Writing and Post Writing. These activities help students recall relevant prior knowledge, encourage to think and act while reading, comprehend and interpret what they have read. Writing helps to develop and organize. Their thoughts and ideas in an appropriate manner. Student were asked to read a book or write a Poem before SIP and submitted its review as an assignment . Some of the selected reviews and poems were read during literary activity which was held on 7th November 2020. The objective of book review was to inculcate reading habits in the student. Reading enriches knowledge and widens the sphere of thinking. The goal of creative writing was to develop the creativity of the student's .Students can develop their writing skills, cultivate an interest in literature. Student enjoyed the activity; they exhibited their creativity through decorative and creative presentation skills. Students participated enthusiastically within this activity and took benefit of developing reading writing and speaking skills within them and thus the purpose of literary activity was achieved. One of the most remarkable outcomes of literacy activity is that a whatapp group by Mrs. S.P. Nibjiya is also formed for the student in which one new word is shared daily to enrich the vocabulary of the students. Activity leaders Mr. A. K.Shende and Mrs. S.P.Nibjiya nicely conducted this activity.

REPORT

Haemoglobin estimation and blood testing is carried out every year for the girls students of B.Sc I year since 2010-11. But this year due the Pandemic covid -19 it was not possible to detect the haemoglobin of these girls physically.

It is very important to create awareness about the importance of Health with respect to haemoglobin among the adolescent girls, so to make them sensitize an online awareness program was organised by Equal opportunity Centre in collaboration with Zoology department on 27th August 2021 at 1.00 pm-2.00pm. Dr. R.R. Laharia, being the speaker, guided the girls about the importance of Hemoglobin and factors affecting it. She had covered various reasons of loss of haemoglobin, nutritional aspect which included various vitamins, and factors affecting RBC production. She had also asked the students to maintain cleanliness, good health and hygiene. Around 74 of B.Sc. 1 year girl students along with ladies staff got benefitted. Dr.P.R.Agrawal, Co-ordinator, Equal Opportunity Cell and members Dr. S.R.Kadu, and Dr. G.N.Daga took the efforts to make the program successful.

Report of Online Video Making Competition

On Theme

"Wonder Discoveries of Physics"

An online video making competition was organized by Physics Society, Department of Physics on 18th March 2021. The theme of the competition was ***"Wonder Discoveries of Physics"***. Due to the COVID pandemic the competition was organized on virtual platform.

The basic objective of this Online Video Making Competition was to increase the interest of students towards Physics and bring physicist amongst them. This competition provided the platform to the students to showcase their knowledge, talent and creativity through the videos prepared by them. By presenting and involving themselves in such events helps the students to enhance knowledge and gain skills.

Altogether there were 22 participants. Three of the best videos were given memento and certificates and one was given consolation prize and certificate. The first winner was Mr. Abhishek Modak, B.Sc.II (CoPE), at second position was Ms. Jaya Samarth, B.Sc.III (PCM), at third position was Mr. Sumer Tiwari, B.Sc.I (CoPM) and consolation position was Ms. Esha Deshpande, B.Sc.I (CoPE).

The event was a great success. It successfully achieved its objective of engaging students to stretch themselves intellectually with research, assimilation and impressive presentation.
